

### Labyrinth:

- Actions:
  - better with modification: sign, factor, init, level1, all orderings with init, ordered with earlier actions more important by level/factor
- best:
  - regarding time: factor 16
  - regarding choices/conflicts: level1
- Fluents:
  - better with modification: sign preferred false, init, level-1
  - generally around the same as VSIDS or worse --> rather modify actions

### Sokoban:

- Actions:
  - everything around the same or worse than VSIDS
  - ordering with later actions more important is noticeably better than the other way around
- Fluents:
  - everything around the same or worse than VSIDS, except init2 avoids 1 timeout and is the best
  - ordering with later actions more important is noticeably better than the other way around

### Towers of Hanoi:

- Actions:
  - better with modification: sign preferred true, init, level-1, ordering with inits
  - in generell not successful
- Fluents:
  - better with modification: sign, factor, init, level1, all orderings with factor, ordering with earlier fluents more important by init
  - best:
    - factor 2
- Fluents much more successful
